

Turf THRIVE and Thatch Remover 32 oz Instructions

1. First remove the clear tab from the bottle (note – once tab is removed product can spill out of the side of the bottle if tipped)

2. In the picture on the left both the red lever and green lever are in the “off” position
Turn the red lever “down” so that it now faces side-to-side versus up and down.
The red lever is now in the “on” position as shown in the picture on the right

3. Push the green lever forward so that it is in the position as the picture on the right above.

The picture on the right shows the position both the red and green levers should be in for the “on” position

4. You may now connect the hose to the hose end of the bottle. Make sure you have pushed the red and green levers into the “on” position before turning the water on.

- Both products will treat 5,000 square feet.
- An estimated 4 minutes of spray time will dispense the contents.
- If you want to use another spray bottle set the application to 10 TBL per gallon of water.
- Apply once the ground temperature has reached 45 degrees
- Our products will not wash away. It is ok to use them before or after a rain.
- If it is dry, we recommend a light watering after application.
- For best results apply in the evening or coolest part of the day.
- Use 3 times a year.
